

Phoenix Molecular Imaging

The Prostate Cancer Imaging Specialists

C11-Acetate PET Imaging

The first and only facility in the Western US approved to produce and use C11 Acetate for the evaluation of prostate cancer under multiple clinical trials.

The physicians at Phoenix Molecular are conducting studies to determine how well C11 Acetate PET/CT scans can improve their

ability to detect residual or recurrent prostate cancer.

Through advanced imaging, such as C11-Acetate PET/CT, we now can know the true limit or extent of prostate cancer. With this information, better treatment decisions can be made.

Multi Parametric MRI

Avoid the discomfort and in accuracy of Random Prostate Biopsies.

If you have a high PSA or are under Active Surveillance for Prostate Cancer, Multi Parametric MRI is the best non invasive way to determine if there is clinically significant cancer that needs further attention.

SPECIAL EVENT : PROSTATE CANCER AWARENESS RACECAR CHARITABLE AUCTION

GRAND PRIX OF SCOTTSDALE WINNER RAISES \$12,650 AT RUSSO AND STEELE

The first car to cross the block at Russo and Steele in January was Lot# 8692, the Grand Prix of Scottsdale-winning Prostate Cancer Awareness 2016 VKC Vintage Kart Company Italiano Vintage Mini Racer, built in May 2016 for the race.

Styled after 1920s Grand Prix race cars, VKC mini racers are custom built in Mesa to each owner's specs. Built to perform, they have rack and pinion steering, hydraulic disc brakes, automatic clutch and a true differential. Hand-crafted in all-aluminum and powered by a 200cc Honda engine, this racer, the 42nd car produced, was painted in Lexus pearl white with blue and orange accents for Phoenix Molecular Imaging (PHXMI), to bring awareness to men's health and prostate cancer.

Forty teams were in competition at the Grand Prix. There are four heats, each about 45 minutes.

The PHXMI team—including professional race car drivers Belinda Endress and Tommy Thompson, along with PHXMI Medical Director Dr Fabio Almeida, his wife Cindy, and facility staff, friends and family—won the race, bringing Prostate Cancer Awareness to the forefront of attention.

Dr and Mrs Almeida and their team then raised even more prostate cancer awareness by donating the winning car to charity at Russo and Steele.

The sale included change of livery to the new owner's specs, with repaint and new decals, plus second pole position in the 2017 Grand Prix of Scottsdale on November 5, 2017, if the new owner enters the race. Also included is free entry to the 2018 R&S/GPX Challenge for the new owner.

The car sold for \$12,650, with all proceeds donated to charity. ■

// Phoenix Molecular Imaging provided free PSA testing on site at the Grand Prix of Scottsdale. Your life could depend upon getting tested. Early detection is your best chance for a cure. Tools such as PSA tests should be part of a regularly scheduled checkup for men starting at age 40, to establish baseline information.
// To learn more about your prostate health and treatment options, visit PCRI.org. For more information on Phoenix Molecular Imaging and the Prostate Cancer Awareness race team, visit PHXMI.com. You can also work to end prostate cancer through a tax deductible donation. Every dollar counts. •
